

Ardor's assessment tools will help ensure learners begin their language journey at the right level. Assessments include reading, writing and speaking components.

Customers can choose from several product offerings, and assessments can be purchased as a stand-alone service - without a required commitment to purchase a course subscription.

ONLINE PLACEMENT TEST

The Online Placement Test contains 60 questions, half of which have an audio recording to check listening comprehension. It is a multiple choice test in which the learner has to choose between five options. The test takes approximately 30 minutes to finish and must be completed in a single session.

ORAL PLACEMENT TEST

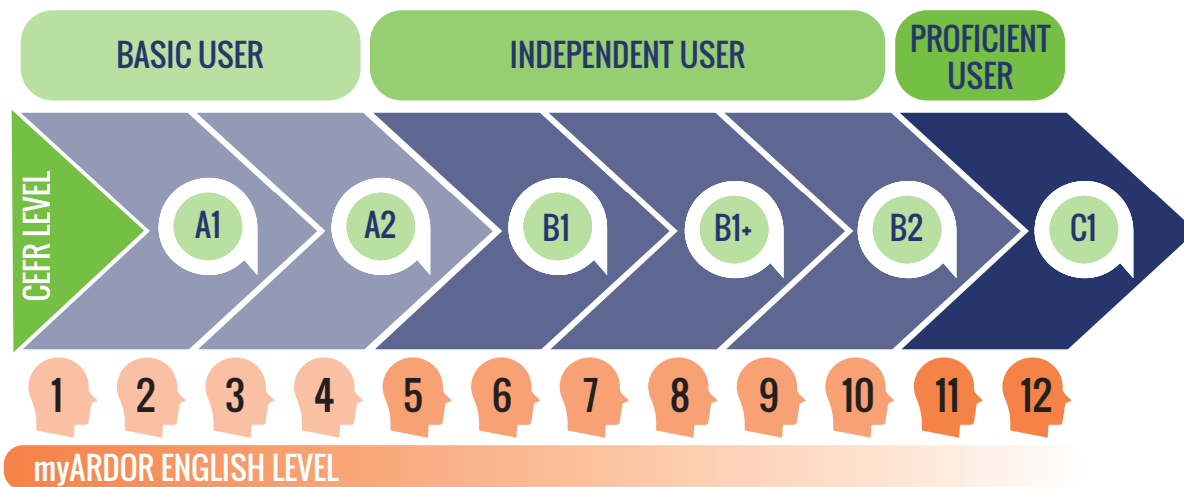

The Oral Placement Test consists of a 10 minute interview carried out via telephone or Skype with an experienced native English teacher. The teacher works from a pre-defined question bank (which is aligned with content and core inventory of the CEFR) to ensure consistency. Based on the learner's comprehension and ability to answer, the teacher can easily vary the difficulty of the interview to focus on the correct level of oral production skills.

EVALUATION

Online Placement Test results are available immediately.
Oral Test results are available within 24hrs.

CEFR

The European Framework of Reference for Languages is a standard developed by the European Council which serves as an international guide to measure the level of reading comprehension as well as oral and written expression in a language.

Tools can be used for pre- and post-course testing.

Reading, listening and speaking skills are tested.

Real time, human-led oral testing eliminates IT and recording problems.

Native English teacher, qualified and experienced in level testing.
